PROFESSIONAL EXPERIENCE

Full-stack Developer / Project Manager
VebCommerce, *Alberta,CA (July 2022 - August 2023)*

VebCommerce, a SAAS Web platform that allows endless integration of e-commerce platforms such as Amazon, eBay, Magento, Shopify & more. Developed to be a one-stop destination & complete automation for all e-commerce sellers.

- Understand business's strategic direction, goals and objectives and deliver the program successfully along those goals and objectives.
- Independently developed numerous end-to-end modules, encompassing data modeling, business logic, **RESTful APIs**, and frontend components.
- Responsible for generating and distributing **Daily Status**, **Weekly Statu**s and **Exit Summary Reports**
- Participate in **Agile** Development methodology of solutions based on acceptance criteria and design to drive the software development process effectively.
- Trace user stories to business objectives and the **product vision** throughout the sprint to ensure it's actually been delivered as imagined.
- Developed dynamic, responsive, and interactive front-end components using **AngularJS**. This involve creating reusable components, directives, controllers, and services.

Web Developer

Lofcart Alberta Ltd, Alberta,CA (Jan 2021 - June 2022)

Web Developer in the team responsible for integrations and developer tools. I was in charge of defining and improving the website which Lofcart.com was running as per business requirements.

- Redesigned existing frontend website architecture to include new features.
- Providing maintenance and support for **Magento 2** Migration, Upgradation, plugin development and updating security patches.
- Designed custom user interactions on Lofcart's web admin panel with inherent features that optimized user journeys and drove a **25% decrease** in bounce rates..
- Developed dynamic Landing pages using frameworks like **NextJS** and **GatsbyJs** with **CMS** tools like **Sanity.io** and **GraphQl.**
- Setup **CI/CD** Pipeline using **DevOps** tools such as **GIT**, **GitHub.**
- Collaborated within an **Agile** development framework, actively engaging in numerous Scrum meetings to drive the software development process effectively.

Bantsy-AI Saas Platform

Alberta,CA (Personal Project)

- Developed frontend **dashboard** and **landing page** using **ReactJS**, **TailwindCSS**, **ShadcnUI**.
- Implemented user authentication and profile with **CLERK**.
- Developed back-end using **NextJS(App router)** with website applications.
- Created 4 AI Saas tools leveraging **OpenAI** developer APIs.
- Maintained all platform databases using **MySql** & **MongoDb**
- Ensured fast customer support by integrating **CRISP**.
- Ensured free, subscription & paywall model with **Stripe**.

Discord Clone

Alberta,CA (Personal Project)

- Server creation and customization, Infinite loading for messages in batches of 10 (tanstack/query)
- 1:1 realtime conversation & calls between members implemented using **Socket.io**
- Unique invite link generation & invite system plus user management (Kick, Role change Guest / Moderator)
- Light / Dark mode, Full responsivity and mobile UI
- **ORM** using **Prisma** and **MySQL** database using **Planetscale**
- Implemented user authentication and profile with **CLERK**.

Education

Computer Programmer, Diploma Program, Co-op   September 2018- May 2021

Georgian College, Barrie, ON

Certifications

- AWS Certified Cloud Practitioner   Sept 2023

- Smartphone Repair Master technician   Oct 2021

- SafeTALK   Sep 2019

- **Communicate** continuously and effectively with external business partners and internal teams to articulate a project's comprehensive requirements.
- Identify gaps in **data requirements** between as-is and to be states. **Model** the data requirements to ensure that the data will support the new solution.

My expertise spans a wide array of programming languages, libraries, and frameworks, such as React.js, Angular.js, Gatsby.js, and Framer Motion, as well as back-end development with Node.js and Python.
